

GBIS Residential Wireless Broadband

Residential Wireless Broadband service from Great Basin Internet Services & Lovelock Cable offers our customers an always-on high speed Internet connection. Unlike DSL or dialup, all service is provided by GBIS and Lovelock Cable with no extra charges for a phone circuit. We provide you with the equipment, service, and support for wireless access.

* Special Setup Offer

For a limited time when you order new service you can opt to pay nothing for setup and simply add a \$7.00 per month lease charge to your service billing. Call us now for further details.

WIRELESS TECHNOLOGY

This service isn't "wireless" in the same sense that your cell phone is. This is a fixed connection that is installed at your home with an antenna mounted outside. This is more like getting DSL or a cable modem, but instead of wires, you have a fixed antenna installed.

GBIS RESIDENTIAL WIRELESS PRICING:
